SEPTEMBER - 2022

WELCOME BACK

School is not just a place, where you'll learn answers to a lot of life's questions, but also a phase, which will make you question a lot of life's answers.

Welcome back kiddos, We hope you all had a relaxing summer vacation. Let's walk down our hallways to a great year filled with learning new things, working together and having a lot of fun! The biggest inspiration for teachers are children! With limited access to our little ones, it was indeed a tough time to be able to come up with something interesting for the newsletter this month....

Their smiles always bring in loads of sunshine and their gloom pinches our consciousness; their hurried feet signal a purpose to move and their stillness give us a moment to reflect; their unending giggles hide many a secrets and their silence leads to many a question; their questions give us food for thought and their answers fill us with awe. To keep it short, our little ones are an answer that fills in every blank and gives us every reason to thank!

OUR MOTTO

Virtue Is the Strongest shield.

VISION

Providing Our Best in Education, For As Many As We Can

MISSION

Holistic Education in an Environment Most Congenial and Innovating, Where Virtue Is the Strongest shield.

Teaching kids to count is fine, but teaching them what counts is best" – Bob Talbert

Dear Parents,

September came in with renewed hope and a reinforced belief that we will always march forward with our learning. It was indeed a great pleasure to have our children back after the summer break. What is really interesting about the conversations we had with them, after they are back from a holiday, is that most of them are excited to share the different experiences that they have had as against a few who are excited about the different toys or materialistic things that they had acquired during that period.

Our students continue to amaze us with their resilience and ability to adapt to the learning environment. The highlight of this month was the visit to Dubai Aquarium as a part of their edutainment trip. During this month students were also encouraged to participate in celebrating special events such as Maerid Faniyun (Art Mela), Story and rhyme competition.

All these special events and activities planned for our students mainly focus on their physical, mental, and emotional well-being. Well-being has been defined by individual characteristics of an inherently positive state (happiness). It has also been defined on a continuum from positive to negative.

So let's open up a whole new world to our students, and give them those beautiful moments that they can hold on to forever.

Looking ahead... With best regards

FROM THE DESK OF HOD-MATHS

HEAD OF DEPARTMENT -
MATHS

Dear Parents,

Greetings!

It gives me great pleasure to share information on the success of our first month of Term-2. It was amazing to see our tiny tots adapted to the routine with ease. Our students' parents have been the backbone of our success. KG1 students learnt about different activities like demonstration of numbers in different ways such as tally marks & ten frames to show their thought process. KG2 students learnt about different activities like skip counting, pattern and 3D shapes.

When children are learning to count, they like to touch, point to and move objects as they say the number aloud – so encourage them to!

~Have your child count toys, kitchen utensils, items of clothing as they come out of the dryer, collections (such as stickers, buttons or rocks) and any other items your child shows interest in counting.

~Sing counting songs and use counting in meaningful ways in games, such as Hide-and-Seek, counting games, rhymes and songs.

~Have your child skip count (counting by twos, fives or tens) to count larger groups of items quickly. Use such objects as blocks, pasta pieces, toothpicks or buttons.

~Play a number version of I Spy. For example, "I spy something that has the number five on it," or "I spy something in this room that there are three of."

~Ask for your child's help to count items in your home. "I wonder how many chairs we have around the table? In this room? In the house?" Count windows, light switches, lamps or beds.

Thank you once again dear parents for your continuous support and cooperation.

WELCOME BACK TO THE SCHOOL

It's school time again! we at The Central School, Dubai reopened the gates to welcome back our tiny tots.

The kindergarten had a wonderful experience in the first week of September. Many ice breakers and fun activities were designed to relax the students and help them become familiar with each other. Students were excited and involved in various interesting and interactive activities. TCS set the stage for an amazing welcome back to meet their classes with fresh and enthusiastic minds.

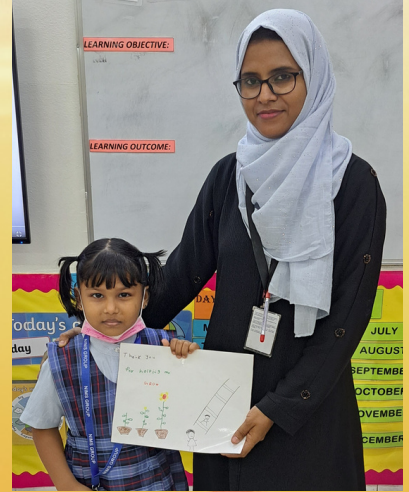

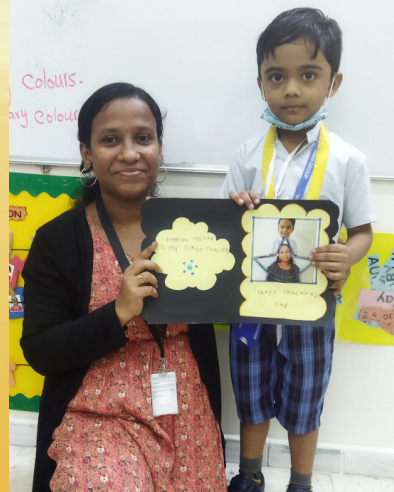

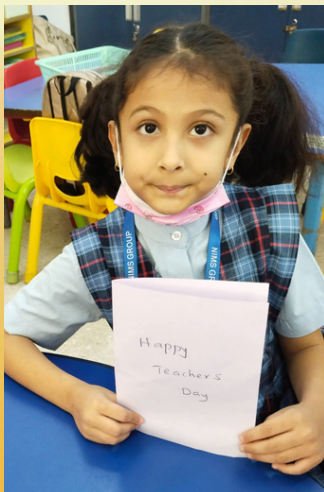

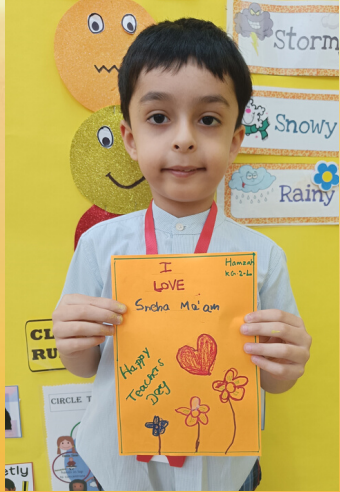

TEACHERS' DAY CELEBRATION

We celebrated Teachers' day on 5th September, 2022. The aim was to raise awareness about teachers' role in their lives. All students wore colour dresses. They prepared lovely cards for their teacher and gifted with surprise gifts.

EDUTAINMENT TRIP

Experiential learning is an engaged learning process whereby students “learn by doing” and by reflecting on the experiences. We organized Edutainment trip to Dubai Aquarium and Underwater Zoo for the Kindergartners. This offered a unique opportunity for our students to create connections which helped them to gain understanding and develop an enjoyment of learning. This Edutainment trip provided with the spirit of investigation among them.

STORY TELLING COMPETITION -KG2

We believe that stories are an indispensable buddy for a child. Educational and meaningful stories help to foster children's reading, creative thinking and provides positive values. Kids eagerly participated in this competition and explored their creativity.

RHYMES COMPETITION -KG1

Beauty is the realm of the poetry, the children enjoy the beauty of expression, thoughts and feeling of words. Taking all these facts into consideration the children got an opportunity to exhibit their talent and confidence through Rhymes Competition. We believe that rhymes are an indispensable buddy for a child. We encouraged our students to nurture their curiosity, skill of presentation and to recite a rhyme with confidence in front of audience.

ART WEEK

Discover art and uncover boundless perspectives through a surprising and delightful mix of Art and colors. Our little artists actively took part in drawing and painting competition. They designed their canvas with their imagination. The blend of imagination and colors gave us an entirely new perspective.

KG 1 – THEME CELEBRATION – COLOUR

Colours are the smiles of nature. Light in nature creates the movement of colours. To express the beauty of nature along with the colours, students of KG1 performed the class assembly on the theme colours. The tiny tots dressed up in primary, secondary and rainbow colours and explained the significance of each colour. It was an excellent learning experience for them.

KG 2 – THEME CELEBRATION – WATER

There's something about the ocean that makes it so mesmerizing which is it's size and all of the different creatures. It was an excellent learning experience for the students exploring water theme. We at the TCS, really enjoyed learning about the ocean and sea life. Students from KG2 celebrated Thematic assembly were they performed as the sea creatures.

WELLBEING ACTIVITY

Flood relief

Charity begins at home and is further reinforced at school. As we are aware, millions of people are affected and highly vulnerable to severe flooding in the Southern and Northern parts of Pakistan. With this in view and to support the survivors, our school organized a Flood Relief Drive. Being charitable will help teach your children about the impact of giving back to the community.

Gardening

Gardening can improve many aspects of mental health, focus and concentration. It helps to improve mood. Gardening can make you feel more peaceful and content. So our tiny tots eagerly donated many plants to our garden
